h2ocleanse, LLC. is a full service water advisory, consultation and filtration company providing strategy and solutions on how to rectify drinking-water borne threats to public health. We work with business, corporate, governmental, education institution and individual clients. Through our team of scientists, engineers and strategists, we reduce the risks of failing infrastructure, natural disasters, storm water system failure, emerging contaminants and disinfectant byproducts. We position our clients to proactively protect their health and the health of their clients while reducing costs and risks. Improved sustainability is a byproduct of all of our services. Our Water Wellness courses ease growing fears of water contamination, and explain how proper hydration improves health, performance and productivity.

Solutions We Offer

SERVICES

- Consultation
- Testing
- Analysis
- Advisory
- Education
- Outreach

FILTRATION

- POTAsia
- Hope for Youth Group Home
- Cerebral Palsy of Association of Nassau County, Inc.
- LeapEDU
- AllState
- MassMutual
- The Hegarty Group
- A World of Pink

Our Difference

We protect our clients both current and unforeseen risks. Our deep and unique understanding of water and the solutions available enable us to hedge against the unknown. Our commitment to doing everything in our power to protect human and animal health guides our white glove level of service and response. We base our work in science and the art of human engagement.

"Dear Ms. Kollar, I am reaching out to express our gratitude for the service you provided when Uniondale Unified Free School District faced our Lead Water crisis in the Fall of 2017. Two years later and we're still protecting our students, teachers and staff with the filtration systems we purchased from you. Since then, much news has surfaced on the many other toxins in Long Island's water system. We feel great knowing that the systems you provided also protect us from these health threats. Knowing you're an MWBE certified firm also helped us reach our goals. Overall, you provided a great value to us and we're thankful for your willingness to also educate us on water." **John LaBare, Director of Facilities and Operations III - Uniondale Unified School District**
